# CHURRASCO COUNTER TOP GAS FUEL

## SPECIFICATION SHEET

48" MODEL CP-CHU-CT-GS-48

### SPECIFICATIONS

The gas fueled CHAR® Churrasco counter-top model is equipped with a single row of rotating skewers. These skewers are driven by a proven industrial gear and motor combination. Skewer rotation is infinitely variable to adjust cooking rate. Above this is a resting row of skewers. Heat zones are maintained by separately controlled burners. The burners are cast iron and the body is fully 14 gauge stainless steel to ensure longevity. To contain the heat where it should be kept, the unit has a ceramic cloth insulated exterior. Cleaning is easy with hand removable grates, radiants, burners, and drip pans. The electric start and safety are controlled by a microprocessor. This unit is available in 36", 48", 60", and 72" lengths.
